PROFESSIONAL SUMMARY

Software Automation Engineer with combined professional experience in QA Automation, test automation, API Testing, and RPA across the financial services and telecommunications sectors. I designed and executed end-to-end test automation strategies with Playwright and Serenity BDD, validated REST APIs with Postman and SoapUI, and led the test strategy for RPA certification cycles covering legal and risk-management processes. I complement this profile with hands-on data analysis experience using SQL and Power BI, applied training in artificial intelligence (prompt engineering, LLM integration), and backend development fundamentals in Python and Node.js. I bring quality-assurance rigor, analytical thinking, and effective collaboration with agile development teams.

TECHNICAL SKILLS

QA Automation: Playwright, Cypress, Serenity BDD, Test Automation, functional, regression and end-to-end testing, test case design, defect management

API Testing: Postman, SoapUI, REST APIs, contract & payload validation, response code validation, API integration

RPA & Process Automation: RPA testing, RPA certification, process automation, workflow automation

Data, SQL & Business Intelligence: SQL (PostgreSQL, MySQL), MongoDB, data validation, Power BI, DAX, Power Query, advanced Excel

DevOps, CI/CD & Agile: Git, GitHub Actions, Docker, CI/CD, Jira, Azure DevOps, Scrum, Kanban

Applied Artificial Intelligence: Prompt engineering, LLM integration (GPT, Claude, Gemini), AI-assisted test automation, AI-assisted development

Backend (fundamentals): Python, Node.js, Express, TypeScript, REST APIs

Frontend / Web (fundamentals): React, Next.js, JavaScript

PROFESSIONAL EXPERIENCE

QA Automation Analyst — Oct 2025 – Apr 2026

Software Quality Assurance S.A. (SQA) · Clients: Telefónica/Movistar, Porvenir · Bogotá, Colombia

- Automated 50+ end-to-end test flows with Playwright and Serenity BDD, cutting regression time by up to 30% per sprint within Scrum/Kanban cycles.
- Designed and executed functional, regression, and end-to-end test cases covering business-critical flows for telecommunications clients.
- Validated contracts, payloads, and response codes for REST APIs with Postman and SoapUI, supporting prepaid and offer-management processes for Telefónica/Movistar.
- Identified data inconsistencies through daily SQL queries in test environments, preventing defects before each release.
- Prioritized critical defects ahead of production releases, coordinating with development and business teams via Jira and Azure DevOps.
- Led the test strategy for RPA certification cycles covering legal and risk-management processes for Porvenir, reaching an approval rate of nearly 90%.

Data Analyst — Professional Internship **Feb 2025 – Aug 2025**

Seguros del Estado · Bogotá, Colombia

- Automated executive Power BI dashboard refreshes every 30 minutes, enabling near real-time monitoring for decision-making.
- Cut report-generation time by more than 70% by automating queries and reports in Excel and SQL.
- Designed DAX measures and data models to build multiple financial-performance KPIs.
- Cleaned and consolidated data from three or more sources, ensuring quality and consistency for executive analysis.
- Identified key operational trends through data visualizations, supporting executive decision-making.

Content Moderator (TikTok Account) **Mar 2023 – Jan 2024**

Teleperformance · Bogotá, Colombia

- Reviewed a high volume of daily digital content, applying policy and quality criteria with precision.
- Monitored quality and productivity indicators, ensuring compliance with service-level agreements (SLAs).
- Detected and escalated incidents and edge cases, collaborating with cross-functional teams on continuous process improvement.

EDUCATION

B.Eng. in Informatics Engineering **Jan 2022 – Jun 2026**

Universidad Militar Nueva Granada (UMNG) · Bogotá, Colombia

GPA: 4.2/5.0

Relevant coursework: software quality assurance, test automation, databases, web development, data analysis, and artificial intelligence.

CERTIFICATIONS

- QA and Test Automation — Platzi (2025)
- API Testing with Postman — Udemy (2026)
- Prompt Engineering with Gemini — Google Cloud (2025)
- AWS AI Practitioner — LinkedIn Learning (2025)
- Claude Code in Action — Anthropic (2026)
- Oracle Cloud Infrastructure – Data Science Professional — Oracle (2025)
- Full Stack Bootcamp — SoyHenry (2024)
- Cloud Fundamentals — LinkedIn Learning (2025)
- Data Analysis Fundamentals — Microsoft & LinkedIn (2024)
- Engineering Basics — Coursera (2023)
